

TRAINING FIELD GUIDE · 2026

FOREST MOTION

A visual guide to building strength, mobility, and agility, one clean movement at a time.

EXERCISE & AGILITY GUIDE

STRONG. QUICK. PRECISE.

This guide combines strength work, dynamic warm-ups, and agility-ladder patterns in one clear visual system.

Prioritize control. Match the volume to your ability and stop if a movement causes pain.

TABLE OF CONTENTS

01 Strength / Squat

Pages 05–10 · strength foundation

02 Dynamic Warm-up

Pages 11–16 · full-body activation

03 Agility Ladder

Pages 17–23 · rhythm and coordination

ONE CARD. ONE FOCUS.

1

Movement name

Use it as your training order or session index.

2

Position visual

Notice body direction, foot support, and equipment.

3

Quick cue

Start slowly, then add speed without losing form.

4

Progression

Add repetitions, duration, or speed gradually.

SECTION 01

BUILD YOUR BASE.

Nine squat variations for lower-body control, stability, and strength.

STRENGTH · 9 MOVES

SQUAT MECHANICS

01

High-Bar Back Squat

Set the bar high on the traps; track the knees over the toes and keep the chest lifted.

02

Low-Bar Back Squat

Set the bar lower; drive the hips back while keeping a neutral spine.

Key focus: full-foot pressure, stable knees, and a depth you can control.

03

Front Squat

Rack the bar across the front shoulders. Keep the elbows high and the torso upright through the descent.

UPRIGHT STRENGTH

04

Deep Squat

Descend through a comfortable range while keeping the heels grounded and the body balanced.

05

Jumping Squat

Drive up explosively, land softly, and reset in a controlled squat stance.

06

Single-Leg Squat

Control the descent on one leg while keeping the hips level and the knee stable.

SCAN THIS TO VIEW 3D VISUAL

STABILITY UNDER LOAD.

07

Uneven Squat

Use an asymmetrical stance and keep the center of mass controlled.

08

Unstable Squat

Reduce the range on an unstable surface and own your balance.

09

Wall-Sit Squat

Press the back into the wall, bring the thighs near parallel, and breathe steadily.

CHECKLIST

- ✓ Stable full-foot pressure
- ✓ Controlled hips and knees
- ✓ Neutral spine
- ✓ Consistent tempo

SECTION 02

WAKE UP THE BODY.

Dynamic movement to raise body temperature, build rhythm, and prepare for the main session.

10

Low-High Jacks

Open and close the feet with active arms; keep each landing light and rhythmic.

11

High-Knee March

Drive alternate knees toward hip height with an upright torso and active arms.

12

Standing Flutter

Alternate long arm swings with light steps while keeping the shoulders relaxed.

MOBILITY CONTROL RANGE

● DYNAMIC RANGE

13

Standing Toe Touch

Swing a straight leg forward and reach toward the toes without excessive spinal rounding.

14

Stepping Trunk Turn

Step and rotate the torso with control toward the raised knee.

Crunches

15

Curl the ribs toward the pelvis while keeping the lower back controlled and the neck relaxed.

17

High-Knee Skips

Skip explosively with high knee drive and opposite-arm action.

18

Partial Push-up

Use a short range while keeping a straight line from head to heel.

RUN AND GO.

SCAN THIS TO VIEW 3D VISUAL

Drive hard into the ground, lean slightly forward, and accelerate progressively.

SECTION 03

OWN THE RHYTHM.

Fourteen ladder patterns for foot accuracy, coordination, and change of direction.

AGILITY · LADDER SERIES

20

1-in-the-Hole

Place one foot in every square. Keep the steps quick, light, and centered.

21

2-in-the-Hole

Place both feet in each square in sequence and maintain a steady cadence.

QUICK CONTACTS

TURN & REACT.

22

90° Turns

Enter the square, rotate 90 degrees, and keep the hips stable.

23

Slalom

Travel in a zig-zag pattern and land with balance on every change.

24

2-Foot Hops

Hop through the squares with both feet together and land softly as one unit.

26

Hop Scotch, High Knees

Combine open-close footwork with an explosive high-knee drive.

SCAN THIS TO VIEW 3D VISUAL

27

Ickey Shuffle

Use an in-in-out lateral pattern with relaxed shoulders and compact steps.

28

1-Foot Hops

Hop on one foot and stabilize the ankle at every landing.

Quality first: do not chase speed until the foot pattern is clean and repeatable.

LATERAL CONTROL

29

2-in-the-Hole (Lateral)

Place both feet in each square while traveling sideways and keeping the chest forward.

30

Carioca

Alternate front and back cross-steps while allowing the hips to rotate naturally.

SHIFT. BRAKE. GO.

31

Front-Back Shuffle

Enter the ladder, exit backward, and lower the center of mass while braking.

32

In-Out Shuffle (1-foot)

Alternate one foot in and out along the ladder with compact steps.

33

In-Out Shuffle (2-foot)

Move both feet in and out while lowering the hips for faster redirection.

34

Agility Shuffle

Shuffle laterally past the ladder with a low stance, active arms, and steady rhythm.

SESSION COMPLETE

MOVE CLEAN. MOVE STRONG.

Consistency beats speed. Repeat each pattern until the rhythm becomes natural.
