

MEYKY AJMARIADI

DIGITAL PRODUCT BUILDER

Tanjungpinang, Kepulauan Riau | 0812-6684-6453 | ajmaaa.dev@gmail.com
Website: <https://meykyajmariadi.xyz> | GitHub: <https://github.com/ajmaaaa>

PROFILE

Computer Science undergraduate and digital product builder focused on creating practical mobile applications and interactive web experiences. Hands-on experience with Android, Flutter, React, and AI-assisted product prototyping, from interface design through implementation. Interested in mobile development, product engineering, and workflow automation.

TECHNICAL SKILLS

Languages: Kotlin, TypeScript, Dart, JavaScript
Mobile: Android SDK, Jetpack Compose, Flutter, Riverpod, GoRouter, Accessibility Services, MediaProjection, ML Kit
Web: Next.js, React, Tailwind CSS, Framer Motion, HTML5 Canvas
Backend and Data: Firebase, SQLite, Cloudflare Workers, REST/HTTP API, PostgreSQL
Tools and Design: Git, GitHub, Docker, Linux, Canva

SELECTED PROJECTS

Scretor - Screen Translator

Android Application | In Development | May 2026 – Present

- Developed an Android screen-translation application supporting selected, copied, shared, and OCR-recognized text.
- Implemented offline-first translation, floating overlays, text-to-speech, romanization, vocabulary caching, and a validated translation service.

Website: <https://scretor.xyz>

Nalara - AI Research & Learning Assistant

Mobile Application Prototype | In Development | June 2026 – Present

- Built a Flutter prototype combining academic-source discovery, contextual AI discussion, notes, flashcards, and assessments.
- Developed authentication, study-room organization, research search workflows, and prototype learning-progress interfaces.

Personal Portfolio Website

Web Application | In Development | July 2026 – Present

- Developed a responsive personal portfolio with interactive project cards, technology carousels, and motion-focused layouts.
- Built a Canvas-based 74-frame viewer with image preloading, pointer dragging, scroll synchronization, and responsive rendering.
